

AT LAST: MASK-FRIENDLY EYEWEAR

At Moldex, we design PPE for industrial and healthcare professionals that has an ideal combination of comfort and utility. It's why we're so excited about ADAPT, new eyewear that functions beautifully with reusable and disposable respirators.

SPECIAL FEATURES

- The close-fitting design, with lower flange, is engineered to be especially comfortable for respirator and mask wearers, while also providing extra protection below the eyes from flying particles.
- The exclusive toric-shaped lens of ADAPT eyewear allows excellent fit with respirators.
- The soft, self-adjusting, flexible flange conforms around the nose bridge, replacing bulky nose pads.
- Flexible temples and soft grip rails ensure a secure fit with minimal pressure, while the ultra-light construction makes wearing ADAPT barely noticeable.
- The UV, anti-scratch, anti-fog coatings help to keep vision clear throughout the day, in the toughest conditions.
- Meets ANSI Z87.1; Z87+; AS/NZS 1337.1; CSA Z94.3.

TRY ADAPT WITH:

- AirWave easy-breathing disposable respirators
- 2200/2300 Series disposable respirators
- 7000/7700/7800 Series reusable half-mask respirators

THE RESULT

Wearers get extra protection that lets both mask and glasses fit comfortably and securely.

Always refer to warnings and instructions prior to use.

IMPORTANT - If these glasses are used with a respirator, make sure that the glasses do not interfere with the seal of the respirator to the wearer's face.

See the difference for yourself. **Talk to your local Moldex distributor or visit moldex.com/adapt to request your sample kit.**
